Every effort will be made to clean and remove all the tarter from your pet's teeth, however, they are awake and depending on how much they wiggle it may be impossible to remove all tarter from their teeth. We strive to be on them for your appointment. We have no control how long the dog in front of your's takes, so please be patient. If we find problems, for example loose teeth, we will talk to you after the cleaning and let you know if any other action is necessary. Please understand our maintenance is cleaning can not replace a dental under anesthesia which can take x-rays.
